

## Soil release agent

### Description

Suma Protect D9.5 is a ready to use product specially developed for the pre-coating of heated, non-food contact surfaces to ease the cleaning process.

### Key properties

Suma Protect D9.5 is a ready to use non-corrosive product suitable for use on non-food contact surfaces in ovens and grills. The product contains a special mix of surfactants and oils that provide a protective layer on surfaces upon drying. Oven soil will now stick to the layer and can be removed with a normal all-purpose cleaner or hand dish wash liquid.

### Benefits

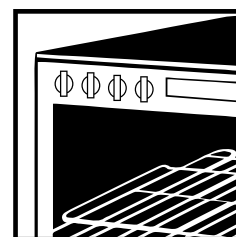

- Safe system - no hazardous chemicals needed
- No need for protective equipment
- Makes oven cleaning easy

### Use instructions

Use neat.

1. Clean surfaces to be treated thoroughly and let dry.
2. Spray Suma Protect D9.5 evenly over the cool surfaces (temperature not above 60°C). Do not spray on food contact surfaces!
3. Switch on the oven and after 15 minutes it is ready for use.
4. To remove the layer along with the dirt, clean with a hand dish wash liquid or all-purpose cleaner solution and allow to dry.
5. Re-apply Suma Protect D9.5.

Suma Protect D9.5 is not suitable for use on steamers, steaming ovens or combination ovens (steam injected) as the layer will solubilize.

# Protect

# D9.5

## Technical data

Appearance: brown liquid

pH value (neat): 9,8

Relative density (20°C): 1,03

*The above data is typical of normal production and should not be taken as a specification.*

## Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; [sds.diversey.com](https://sds.diversey.com). Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.

## Product compatibility

Under recommended conditions of use, Suma Protect D9.5 is suitable for use on materials commonly encountered in the kitchen.
