

Liquid mechanical ware washing detergent for hard water

Description

Suma Linos L6.8 is a concentrated liquid mechanical ware washing detergent specially formulated to provide excellent soil removal in hard water conditions.

Key properties

Suma Linos L6.8 is a heavy duty alkaline liquid detergent which is suitable for use in a wide range of single and multi-tank ware washing machines. It contains a blend of caustic alkali and scale control agents, which will provide excellent soil removal and anti-scaling in hard water conditions.

Benefits

- Quickly removes grease and dried-on food
- Prevents scaling of the dish wash machine even in hard water conditions
- Very effective due to highly concentrated formulation

Use instructions

Suma Linos L6.8 is normally applied using Diversey automatic dispensing equipment. It can however be used in conjunction with integral dosing pumps where fitted. To ensure perfect cleaning results in hard water conditions, dose at a concentration of 0,4ml/l*. At 2 ml/l, this will prevent scale deposits in water containing up to 180ppm CaCO₃, 10,1°dH, 18°FH.

Actual dosage will depend on site conditions (water hardness, degree of soiling, procedures).

At first use, rinse pump and transport tubes of the dosing system to avoid possible crystallization in these tubes caused by mixing of products.
