

Oxivir® Plus

Tough on pathogens not on people, surfaces and the planet

Oxivir Plus

Tough on pathogens: Effective against a broad range of pathogens that threaten your business including bacteria, viruses, fungi and yeasts.

Not on people: The in use formula is non classified and contains no perfumes or dye.

Not on surfaces: The product is compatible with a wide range of surfaces and is even WoolSafe approved for soft furnishings.

Not on the planet: The concentrated formula reduces transportation and packaging waste whilst the formula itself contains actives that readily break down into oxygen and water.

Tough on pathogens

Oxivir Plus is a powerful broad spectrum cleaner disinfectant. It has excellent bactericidal, virucidal and fungicidal activity. The formulation is based on innovative Accelerated Hydrogen Peroxide technology that effectively destroys pathogens such as MRSA, Hepatitis C and Norovirus. Its excellent disinfection properties do not compromise its performance as a cleaner. The acid component of Oxivir Plus also gives effective descaling properties, leaving minimal streaking for a prestige finish. The simultaneous cleaning and broad spectrum disinfection action differentiates Oxivir Plus from other disinfectants on the market. The dual action offers cleaning confidence whilst saving time and money. Critical tasks such as terminal cleaning can be executed quicker.

Not on people, surfaces and the planet

People: Oxivir Plus contains no perfumes or dye. Unlike some products Oxivir Plus does not contain high levels of volatile organic compounds (VOCs). When the product is diluted for use, it is not classified as hazardous.

Surfaces: Disinfectants are often too aggressive for most surfaces, and can bleach or cause damage but Oxivir Plus is safe on a wide range of surfaces. It is even WoolSafe approved for soft furnishings, though it cannot be used on marble and acid sensitive surfaces.

Planet: Oxivir Plus is available as a concentrate that can be diluted at point of use meaning less packaging and less chemical miles. Furthermore the J-Flex® and SmartDose™ packaging provides dosage control and stops the product from being used at the wrong dilution limiting waste.

J-Flex carries enough product to produce 57 trigger sprays and SmartDose 78 triggers, considerably reducing the amount of plastic that is thrown away.

Oxivir Plus contains active ingredients that readily break down into oxygen and water. Also available in ready to use format.

Oxivir® Plus

Infection prevention

Infections can seriously affect the rhythm of any organisation. Oxivir Plus, in combination with the right procedures and an infection prevention strategy can reduce the frequency and longevity of outbreaks in healthcare, hospitality and education facilities.

Oxivir Plus is ideal for dealing with contaminated body spillages, controlling pathogen outbreaks and cleaning high risk infection areas. The actives in the formulation do not promote resistant strain development for additional peace of mind.

Disinfectant accreditation

Oxivir Plus has been tested according to the most recent European Standards and is proven to be an outstanding disinfectant with bactericidal, virucidal, fungicidal and yeasticidal properties.

| Product | Pack size | Article code | Description |
|--|------------|--------------|--|
| Oxivir Plus | 6 x 750ml | 100829234 | Ready to use 750ml spray bottle for ultimate convenience. The bottle contains a pre-diluted formula at the right concentration to achieve bactericidal, fungicidal, yeasticidal and virucidal efficacy. |
| Oxivir Plus J-Flex | 5 L J-Flex | 100829921 | The innovative J-Flex pack contains a concentrated version of the formula, but can also be connected to a water source to deliver automatic dilution. This guarantees simultaneously the correct dosage for proper disinfection. |
| Oxivir Plus SmartDose | 1.4 L SD | 100827424 | The SmartDose concept allows easy, safe and accurate dosing of concentrated cleaning products. |
| Oxivir Plus Body Spillage Kit (with storage bag) | 1 pc | 100840608 | 2 kits consisting of: Disposable nitrile gloves, disposable face mask, disposable plastic scraper, disposable bio-hazard bag, absorbent granules – 40g, disposable paper towels, disposable apron, disposable foot gloves and Oxivir Plus 750ml spray bottle. |
| Oxivir Plus Body Spillage Kit (refill kit) | 4 x 2pc | 100842411 | Contains 8 spillage kits. |
