Consumables

**Hygienic Solutions for Long Term Care**  
Safe and homely care.

## Safe and homely care

As the senior population grows, we can help them remain healthy and independent in a supportive and clean environment. We understand the importance of making care and nursing safe, but also homely.

With Norovirus, cold & flu, and other pathogens often found in these environments, we provide resources to address specific needs, and help preserve the quality of life for residents in the full continuum of care.

## We understand your challenges

We work with you to create a safer, cleaner and more homely environment for long term care facilities.

### Resident Experience

Our programs will make your site shine, from the floors to the dishware. Our comprehensive offering protects everything, from equipment and surfaces to hands and linen.

### People and Safety

We offer you the safest possible chemistries, dispensing solutions, clear labelling and training materials to reduce risks and improve worker safety. We can also help you minimize the risk of slippery floors.

### Infection Prevention

Through extensive programs, game-changing disinfectants, and intelligent hand hygiene systems, we can disrupt the transmission of infections via hands and surfaces

### Operational Efficiency

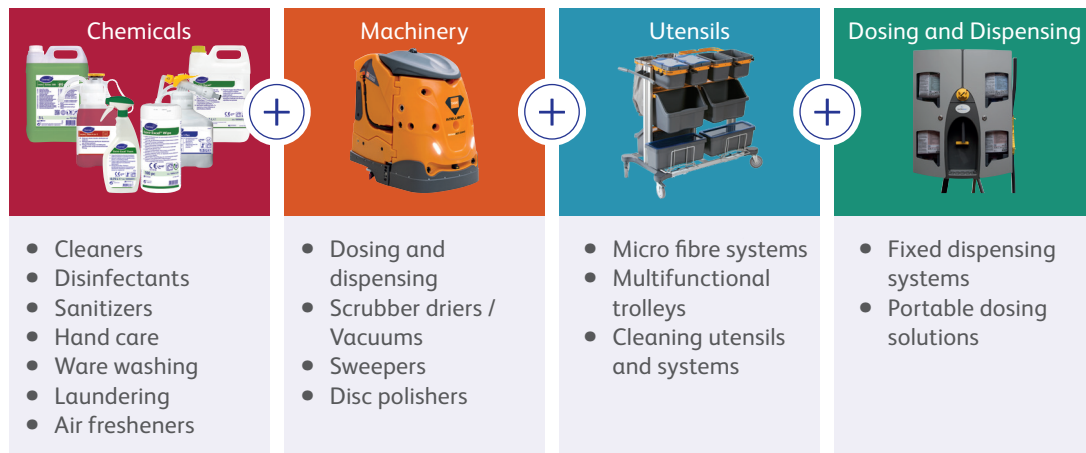

We understand your need to deliver a cleaner, safer facility at a cost that respects your bottom line, which is why we optimize all aspects of your cleaning practices to enable greater operational efficiency.

## Why CK Consumables?

We provide hygienic solutions for all key areas of long term care

## Our integrated healthcare solutions

# Our hygienic solutions presented in 3 programs

## SAFE RESIDENT

Enhance customer experience

## SAFE LAUNDRY

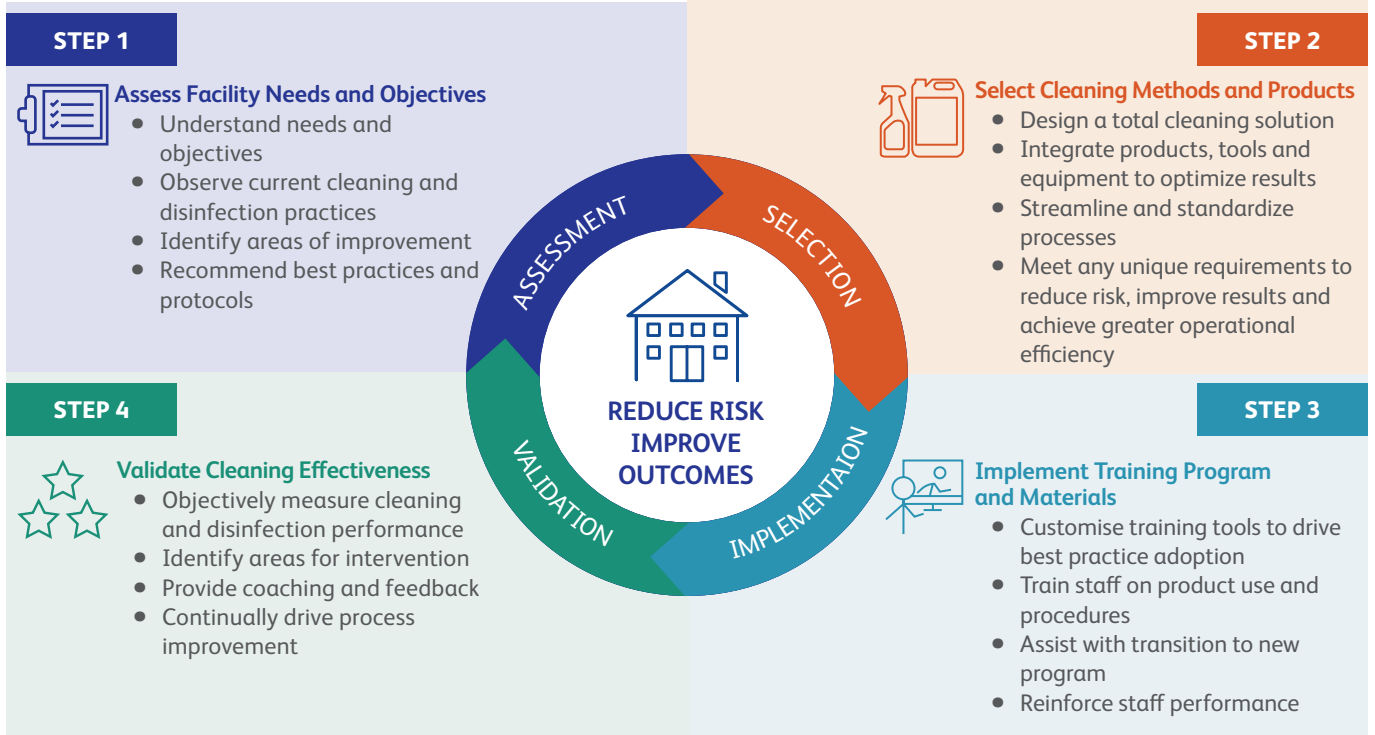

Hygienically clean, fresh smelling assets

## SAFE KITCHEN

Food safety

Our solutions and programs are designed to elevate the quality of service and care for residents, staff and visitors. The solutions integrate products, processes, training to not only improve results, but also reduce risk and lower overall cost.
