

## Carry Tray

### Key Advantages

- Ergonomic Design
- Safe & Convenient
- Sustainable

### Benefits

- Comfortable for the User
- Multipurpose and Easy to Use
- 100% Recycled Materials

The Diversey Carry Tray is an ergonomically designed caddy for convenient transportation of cleaning chemicals and equipment. Ideally suited for the cleaning of hotel rooms and other small areas, the tray can carry up to 5 bottles of either Room Care or Building Care cleaning chemicals. The brand new removable toilet brush holder allows for safe transportation during toilet bowl cleaning, avoiding drips and splash back. Removable extensions can be attached to either end of the carry tray in order to carry additional tools such as sponges and microfibre cloths, also allowing for segregation of clean and soiled textiles.

The Carry Tray handle has been ergonomically designed with lightweight materials for comfortable transportation even when fully equipped. The extended position ensures that there is reduced risk of hand contact with chemical bottles. The grip is also textured for increased comfort.

The smooth curved edges of the tray ensure there are no sharp edges and it is easy to clean after use. Dirt traps are kept to a minimum.

The Diversey Carry Tray is manufactured with 100% recycled materials which reduces waste production, improves product lifecycle and increases durability.

## Diversey Carry Tray

### Technical data

Size Complete  
(including 2 x Extensions): approx. 610mm x  
375mm x 275mm

Materials: Polypropylene (PP)

Weight Complete  
(including 2 x Extensions): 1,570g

### Packaging Information

Article code: D7524356

Pack: 1 pc

Description: DI Carry Tray Complete

Colour: Black
