

Suma Star-plus D1 plus Mini Guide

Available in 1.5L Divermite pouches

Benefits...

Divermite pouch

Concentrated hand dishwashing liquid

To be used with Divermite dispensers

Use for manual washing:

Utensils

Crockery

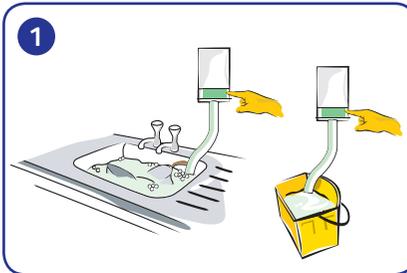

Glassware

Pots and pans

Application...

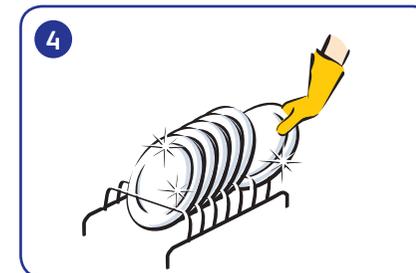

Step 1: Dosage size is adjusted by the Diversey representative according to sink volume and performance preference. Depress the Divermite plunger while first sink is filling with water. When water level reaches the fill line, recommended solution is achieved.

Step 2: **Soak:** Wash with cloth, brush or scouring pad. For heavier soils, allow items to soak in solution.

Step 3: Rinse thoroughly. Apply a sanitation step after manual ware washing according to local regulations. If possible, wash all ware through the dishwasher.

Step 4: Allow to air dry.
