

Endbac Sanitising Probe Wipes

The professional choice for kitchen sanitising

Endbac Sanitising Probe Wipes

- ▶ Maximised bacteria kill
- ▶ Non-tainting formulation
- ▶ Efficient and convenient

Maximised bacteria kill

- ▶ Endbac Probe and Utensil Sanitising Wipes' are effective against a wide range of common food poisoning bacteria including Salmonella, E.Coli, Straphylococcus Aureus and Streptococcus Aureus. The product formula incorporates a preservative system that ensures effective germ kill is maintained for up to two years if the product is stored correctly.

Non-tainting formula

- ▶ Endbac Probe and Utensil Sanitising Wipes' non tainting, odourless formula is suitable for sanitising probes and utensils between applications.

Efficient and convenient

- ▶ Endbac Probe and Utensil Sanitising Wipes' are made from a high quality, non-woven material that offers excellent strength and absorbency. Because they are designed for single use and are disposable, they are ideal for "clean as you go" tasks.
-

Endbac Sanitising Probe Wipes

Endbac Sanitising Probe Wipes are ready to use, disposable wipes for sanitising probes and kitchen utensils between applications.

Usage Instructions

- ▶ Remove lid, thread wipe through centre hold and replace lid.
- ▶ Pull each wipe sharply at an angle to dispense.
- ▶ Sanitise the probe or the utensil with a careful, firm wiping action.
- ▶ After use, dispose of each wipe - do no re-use.

Technical Information

Appearance: blue, food grade wipes

pH: 7.0

Top tips

- ▶ Avoid contact with skin and eyes.
- ▶ Rinse and dry hands after use.
