## WINDOWBUDDI

Window Buddi has double side water spraying function (automatically spraying water every two seconds, with a water spray time of 500ms).

It has a microfibre mopping pad which is smooth moving and removes stains and dirt easily.

It has a 2 gap detection sensors for frameless window cleaning and 4 mechanical sensors around the robot, detecting obstacles (IR sensors can not work proper under sunshine). It also has AI technology and anti-falling control algorithm with uninterruptible UPS system, keeping absorption on the glass for more than 40 minutes after power failure.
